1 Preface

Marques and plants in Volkswagen AG which are working on this guide (s. below) accept the delivery and transport data in accordance with VDA 4913 in versions 1, 2, 3 and 4, depending in the application.

Use of EDIFACT DESADV is mandatory for delivery and transport data as part of the OT drop shipments! It can be used in parallel with VDA 4913 for all other volumes. EDIFACT DESADV can also be used alternatively for all other volumes, including series and A material. The call-offs for the VW-OT drop shipments are commissioned with the EDI message, direct delivery instruction DELJIT/CALDEL.

Please pay attention absolutely, that always for every different VW/Audi packaging type a separate 715th record has to be written. Missing packaging data records lead again and again to wrong packaging stock figures

You may find detailed descriptions of required structure notation for packages sent to Volkswagen AG on our website. The regulation for the structured embodiment of packages in the VDA 4913 "Package representation in the delivery note data VDA 4913/4" - is to be followed absolutely!

The VDA-recommendation is available in German under number VDA 4913 at the VDA.

Record types and record type sequence of delivery note and transport data.

Supplier – VW Delivery note

Rec Type	Version	M/C	Rep	Data Content
711	02-04	M	1	The header record of the delivery note and transport data set contains transmission related data (once per transmission)
712	03	M	1	One-off data elements of shipment (once per shipment) must follow 711 may follow 714, 715
713	03	M	1	One-off data elements of delivery note (header data) must follow 712 may follow 714, 715
714	02/03	M	R	Item data of delivery note (once per delivery note item) must follow 713 may follow 714, 715
716	02	C	1	Text data on item may follow 714 Audi expects here the "Engineering Change Status" information (not used at present by VW)
715	02/03	M	1	Packaging material data (must follow each delivery note item once) may follow 714, 716 or 715
717	01	C	1	Individual packaging data (not used in the suppliers' transmissions)
718	01	C	R	Production number data (Lamborghini only)
719	02	M	1	Trailer label record containing delivery note and transport data (once per transmission) must follow 715 or 714

Instructions for the column headers and codes of the data fields.

Key M = Must (Mandatory)

K = May (Conditional)

A = Alpha numeric (Text in tables must be left-aligned)

N = Numeric (Text in tables must be right-aligned)

R = Required if different than status "K"

The use of the data elements at VW is defined in the "Verbal descriptions", if use is differing from the VDA-recommendation.

5 Change list

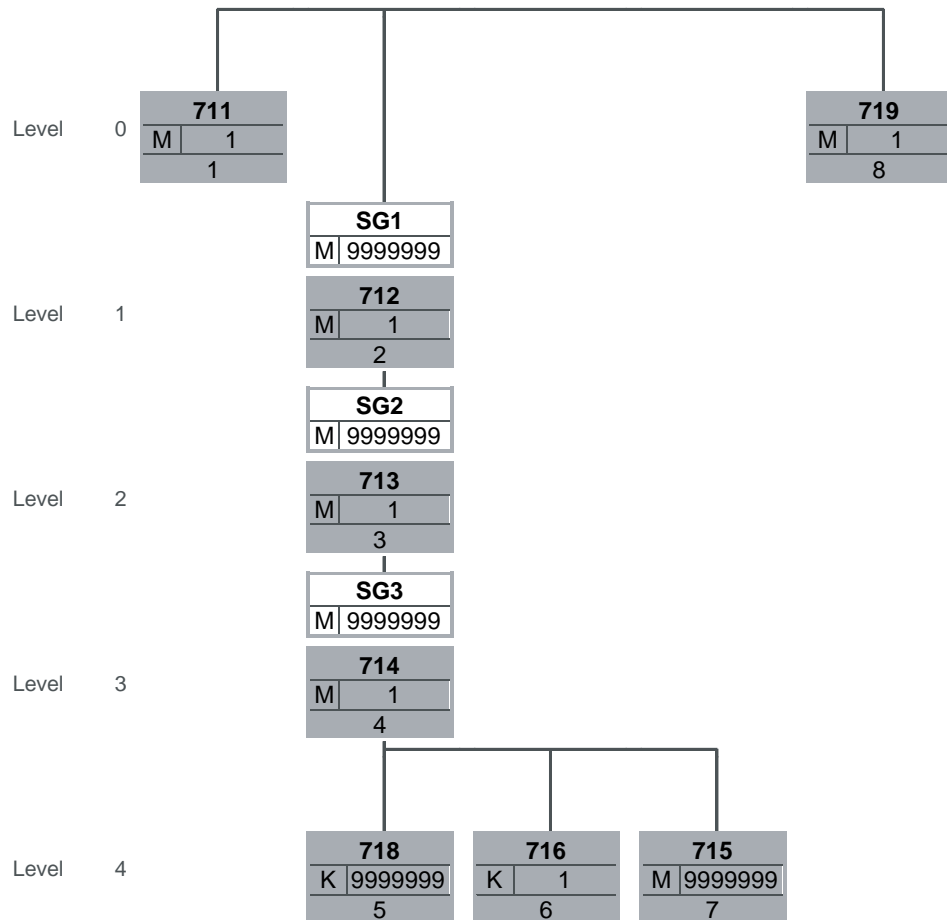

Date	Version	Description	Record type_line number
2012-07-30	2.0	Description changed: Blank =With one way packaging only in SA 715, Pos. 14 = E	715_15
2012-07-30	2.0	Status K => M	715_08
2012-07-27	2.0	Record type 718 for Lamborghini added.	718_02
2012-07-27	2.0	List of allowed characters.	714_14
2012-07-27	2.0	Link to new code list added.	714_05
2012-07-27	2.0	Description changed	713_15
2012-07-27	2.0	Description changed.	713_05
2012-07-27	2.0	Description changed	713_03
2012-07-24	2.0	Description for the rule max. 999 packages added. S label Format n3.	715_05
2012-07-02	2.0	Format: Maximal 9stellig. Format: 9-digits maximum.	712_13
2012-06-15	2.0	Format an..7 added.	715_03
2012-05-21	2.0	Lieferschein/Delivery note replaced by Transport ans Shipment Bills.	714_06
2012-05-21	2.0	VW definition of shipping date added.	713_04
2012-05-16	2.0	Format an..2 added	712_04
2012-05-16	2.0	Status K => D	712_04
2012-05-16	2.0	Code 1 deleted	712_16
2012-05-16	2.0	Comment in regard to the TSB-Generator added.	712_12
2012-02-06	2.0	Bedingung ergänzt: Bei Anlieferungen an Lamborghini muss das Eintreffdatum Soll immer übertragen werden. For deliveries to Lamborghini the Shipment delivery date must always be transmitted.	712_18
2012-01-27	2.0	Format changed from A9 to N9.	715_09
2012-01-27	2.0	Format changed from A9 to N9.	715_08

2 Message Type

Tag	No	St	MaxOcc	Name
711	1	M	1	Record type 711, version 03, Initial Record containing transmission data header of delivery note and transport data
SG1		M	99999999	
712	2	M	1	Record type 712, Version 03, One-off transport data, once per shipment.
SG2		M	99999999	
713	3	M	1	Record type 713, Version 03, One-off data element of the delivery note, once per delivery note
SG3		M	99999999	
714	4	M	1	Record type 714, Version 03, delivery note position data, once per delivery note position.
718	5	K	99999999	Record Type 718, Version 02, Production numbers
716	6	K	1	Record Type 716, Version 02, Text data.
715	7	M	99999999	Record 715, version 03, packaging data
719	8	M	1	Record Type 719, Version 02, trailer label delivery note and transport data, once per transmission process

This message structure described. A documented Segment/Segmentgroup shouldn't have to be assigned always. In contrast to the EDIFACT- Message layout chart the different Segment-version will be displayed explicitly.

3 Branching Diagram

This message structure described. A documented Segment/Segmentgroup shouldn't have to be assigned always. In contrast to the EDIFACT- Message layout chart the different Segment-version will be displayed explicitly.

4 Segment Details

No	Tag	St	MaxOcc	Level	Name
1	711	M	1	0	Record type 711, version 03, Initial Record containing transmission data header of delivery note and transport data

Standard					Implementation	
Tag	Name	from to	St	Format	St	Usage / Remark
711_01	Record type	1-3	M	N3	M	constant "711"
711_02	Version no.	4-5	M	N2	M	03 Version 03
711_03	Data Receiver ID / Customer ID	6-14	K	A9	N	Not used. Not used
711_04	Data sender ID / Supplier ID	15-23	M	A9	M	Complete Supplier ID which was transmitted in the underlying Call-off. If the Call-off was sent without index (VW/Audi Europe only) the 1-digit index of the supplier's plant location (1-9, A-Z) must be added. When the VDA 4913 is registered by the carrier (consolidated shipment) the supplier ID of the data registering carrier is transmitted here. The complete supplier ID is sent through the carrier in record type 713, Pos. 16.
711_05	Old transmission no.	24-28	M	N5	M	
711_06	New transmission no.	29-33	M	N5	M	
711_07	Transmission date	34-39	M	N6	M	.RemarkEN Format: YYMMDD YYMMDD
711_08	Sub-supplier no.	40-48	K	A9	N	Not used. Not used
711_09	Carrier ID	49-57	K	A9	N	Not used. Not used
711_10	Key to stocklist	58	K	A1	N	Not used. Not used
711_11	Delivery code	59	K	A1	K	Not used.
711_12	Empty	60-128	K	A69	K	Filled in with blanks.

Remark:

Example:

71103 0190613002306823069070214

No	Tag	St	MaxOcc	Level	Name
	SG1	M	9999999	1	712-SG2
2	712	M	1	1	Record type 712, Version 03, One-off transport data, once per shipment.

Standard					Implementation	
Tag	Name	from to	St	Format	St	Usage / Remark
712_01	Record type	1-3	M	N3	M	constant "712"
712_02	Version no.	4-5	M	N2	M	03 Version 03
712_03	Shipment Load Reference Number	6-13	M	A8	M	The SLB number must be clearly marked on the bill of lading. instead of the bill of lading the shipment order according to VDA 4922 is used, the SLB number is entered in field 8 of the shipment order. The reference number, which the loader allocates to the shipment/ load; right-aligned entry with preceding zeros. Reuse of this number is not allowed within a year. The restrictions described below are to be observed when allocating number. For each goods receipt plant at least one SLB number is allocated.
712_04	Plant supplier	14-16	K	A3	D	The plant identifier / supplier index for the delivering supplier plant allocated by VW/ Audi Europa is entered in left-alignment if the supplier number is transmitted in record type 711_04 inclusive Index. The plant identifier / supplier index for the delivering supplier plant allocated by VW/ Audi is entered in left-alignment.
712_05	Carrier	17-30	M	A14	M	Name and/or transport company ID, under which transport is implemented.
712_06	Carrier transfer date	31-36	M	N6	M	Date of shipment transfer to the carrier. Form: YYMMDD
712_07	Carrier transfer time	37-40	K	N4	N	Time of shipment transfer to the carrier. Form: HHMM Not used
712_08	Gross shipment weight	41-47	M	N7	M	Weight of goods including packaging and / or loading equipment but excluding the carriers' containers (instruction from bill of lading), unit of quantity in kg, entry is right-aligned with preceding zeros, no decimal place. The field content must be equal to the given weight on the bill of lading.
712_09	Net shipment weight	48-54	K	N7	K	Goods weight including packaging without loading equipment and carriers' containers. Unit of quantity in kg, entry is right-aligned with preceding zeros, no decimal place.
712_10	Pre-payment of charges key	55-56	K	N2	K	01 Unpaid 03 Paid Indicates, who pays the freight charges.
712_11	Carrier transmission key	57	K	A1	K	
712_12	Number of packages	58-61	K	N4	D	The number which is entered in the shipment contained loading unit. Entry is right-aligned with preceding zeros, no decimal place. Necessary if the TSB-Generator is used for the creation of Transport and Shipment bills.
